作者的話:

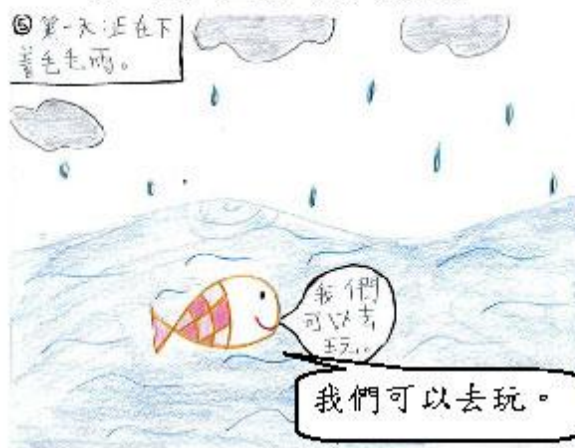

My name is Vamika Puri, I am Indian and I am 13 years old. I am a F3 student in Marymount Secondary School. My story is about a young fish that lives in a pond. During the time frame of a few days, the pond floods and everything, including the little fish is swept away into the sea. In the sea, when the little fish is most alone, he finds a friend, another small fish. They become good friends and at the end of my story, both fish meet their friends and parents. I created this story because I wanted to let people know how global warming is affecting sea creatures, and as I knew that little children would be reading this story, I decided to make fish my main character, so as to entertain the readers while having a deep meaning.

作品介紹:

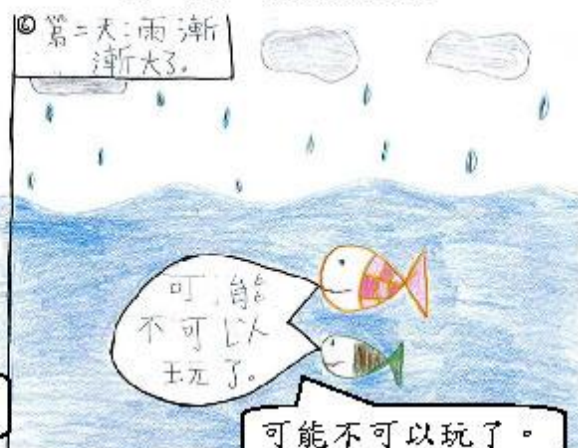

作者喜歡探險，所以作品以探險為主題。作品中的主角是一條小魚，他因為環境污染的問題而和自己的家人走失，途中遇到同病相憐的另一條小魚，最後更和家人團聚。作者利用豐富的想像力，把社會問題用有趣的手法敘述出來。希望大家細心欣賞。
